Heat resistance (°C)

Heat Resistance according to DIN EN 12877. The highest temperature in which a pigmented sample withstands a dwell time of 5 min in the barrel of an injection-molding machine without significant color change.

Light fastness

Measured according to ISO 105 - B02. Blue-wool scale 1-8, where:

1: *Very poor*; 8: *Excellent*.

Food packaging

Greek Food Code : All the pigments contained in the masterbatch comply to the requirements of the last revision of the Article 26 of the "Code for substances and articles in contact with foods and beverages" published in the Greek Government Gazette issue 195B /21-2-2003.

B.f.R. : All the pigments contained in the masterbatch comply with the requirements of B.f.R. (German Food Contact Legislation).

Directive 94/62/ EC: All the pigments contained in the masterbatch comply to the European Packaging and Packaging Waste Directive 94/62/ EC. It should be noticed that Barium pigments are not banned from the above directive and are included in some of these masterbatches.

(•) *complies with the indicated regulation.*

(x) *does not comply with the indicated regulation.*

Compliance with other local regulations may be verified upon request.

To obtain your product data sheet copy, please contact us.

Diarylides free

No diarylide pigments are included in the masterbatch. Acc to ETAD NOTICE 2 there is the potential of thermal decomposition of these pigments at a working temp above 200° C. Therefore where diarylides are present, a heat stability of 200°C is given although the colouring attributes of these pigments remain stable at higher temp. (240° C).

(•) *Diarylides free*

(x) *Contains Diarylides*

Application

(•) *Recommended*

(o) *Can be used (subject to tests by the client)*

(x) *Not Recommended*
